# High Spec Decoration

# High Spec Decoration Options

## Heat transfer

For 10 to 20 Litre Round containers, this process permanently bonds the label to the container offering the equivalent graphical resolution as an InMould label, however adds the benefit of smaller run sizes giving you the flexibility to have superior decoration across your entire range.

## in mould labelling

For our square container range, Viscount Plastics (Australia) "VPA" uses the latest European InMould labelling technology to provide a spectacular finish to your packaged product. Your artwork will be enhanced by your choice of either gloss or matt finish labels, and we can offer a full wrap or partial label to allow graphics of any width up to 360 degrees of wrap. The polymer InMould label allows the entire package to be 100% recyclable.

## offset printing

Traditional direct container printing in up to six colours, available across VPA's entire range of round containers.

## screen printing

Direct printing in up to four colours across VPA's straight sided can and full cartridge range of products

## adhesion labels

Self-adhesive or wet-glue, which are applied in house, are available for the entire VPA range of containers.

Contact your Viscount Plastics (Australia) Representative for further details including samples and setup specifications.
